SUMMARY

Operations and team lead professional who runs a 35-person remote team. I work across the operational spectrum: leading and coaching people, owning process documentation, coordinating workflows, handling escalations, and supporting the individuals who depend on clear, timely guidance. Trained in Applied Psychology, which shapes how I communicate, de-escalate, and keep people aligned under pressure. I work fully remotely and async, learn complex tools and guidelines quickly, and care about getting both the process and the human side right.

EXPERIENCE

SME / Acting Team Lead · Innodata India — Mustang Project (Remote)

Jan 2026 – Present

- Lead a remote team of 35 contractual FTEs on an AI/LLM evaluation project, having been promoted from analyst within roughly five months during a period of high operational demand.
- Received 100% positive feedback from the team in a direct review conducted by the Operations Manager — every team member surveyed reported a positive experience.
- Maintain process documentation and coordinate workflows so the team has a single, reliable source of truth, and act as the day-to-day point of contact for internal stakeholders.
- Onboard and coach new team members, track productivity, and get people up to speed on complex evaluation workflows.
- Handle escalations end to end: investigate the issue, communicate clearly with the people affected, and follow through until it is resolved.
- Earlier, served as the email point of contact for around 90 independent contractors, resolving questions on work processes, invoicing, and day-to-day blockers and following up until they were closed.

AI/LLM Analyst (Rater) · Innodata India (Remote)

Aug 2025 – Jan 2026

- Evaluated AI model outputs for quality, accuracy, and adherence to detailed guidelines — the human-in-the-loop work that trains and benchmarks large language models.
- Worked across a range of evaluation task types and projects, applying complex rubrics consistently and at pace; spent the final stretch on the Mustang project before moving into the SME role.
- Built deep, practical familiarity with how AI systems are assessed and where they fail — directly relevant to supporting users of AI products.

EDUCATION

M.A. Applied Psychology · University of Delhi (South Campus) — CGPA 8.0

2021 – 2023

B.A. (Hons) Psychology · Rama Devi Women's University — CGPA 9.33

2018 – 2021

ACHIEVEMENTS & CREDENTIALS

- Qualified **UGC NET** (June 2025) on the first attempt.
- Top national entrance ranks: **AIR 5** (Pondicherry University), **AIR 15** (University of Hyderabad), **AIR 30** (DU Entrance Test); **All-Odisha Rank 3**.
- Recognised for essay and debate at the university level, including an award presented by the Governor of Odisha.

ADDITIONAL

- Languages: English (full professional), Hindi (fluent), Odia (native).
- Self-directed work with AI tools (2023–2025): used LLMs to interpret statistical outputs (ANOVA, regression, t-tests) and built reusable templates to generate study material — comfortable adopting and getting practical value out of new tools quickly.
